

App. No. 10/710,960

**REMARKS - General**

The claims have been rewritten as a system claim which should address the Examiner's Section 112 and Section 101 rejections. The claims have also been rewritten so that the invention is non-obvious in regards to the 102 rejection based on Friesen, et al., US PUB 2003/0050806.

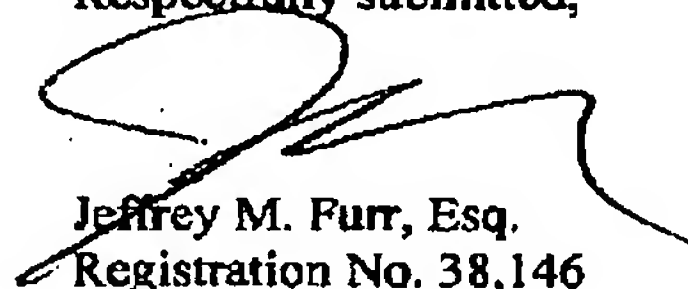

The claims have also been rewritten so that the invention is non-obvious in regards to the 103 rejection based on Friesen, et al., US PUB 2003/0050806 in view of any of the single references Watanble, US PUB 2003/0074236, Fitzgerald US PUB 2204/0039612 and Altman US PUB 2003/0120526. Material has been added to the base claims that are not disclosed in Friesen which Applicant contends makes the new claims novel and non-obvious to someone skilled in the arts.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

**Conclusion**

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

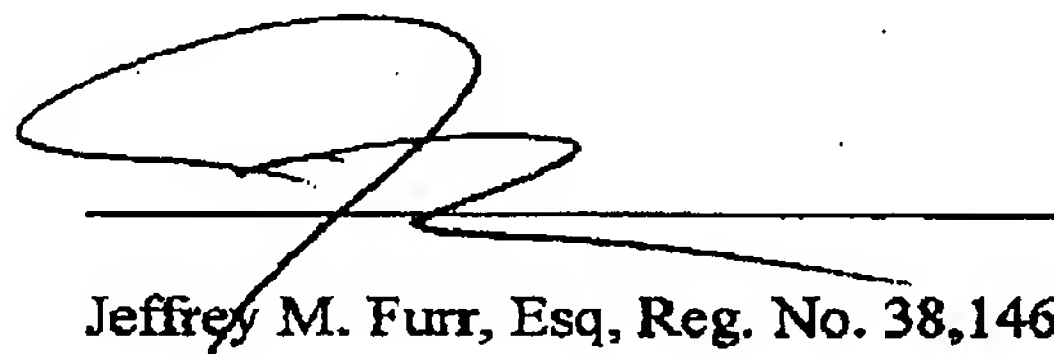

Respectfully submitted,

Jeffrey M. Furr, Esq.
